A LOOK BACK
WORLD HEALTH SUMMIT
BERLIN, GERMANY & DIGITAL
OCTOBER 24–26, 2021
“The most important contribution which needs to be made for more fruitful actualization of innovation and technology potential we have in Europe is that we have to ensure a climate and culture which is open to innovation and open to science and its translation.”

ÖZLEM TÜRECI
Chief Medical Officer, BioNTech

“We all talk about vaccine equity but the same applies to other medical diagnostics and tools.”

SOUMYA SWAMINATHAN
Chief Scientist, World Health Organization (WHO)

“It is critical that we supply vaccines everywhere and that we have equity in vaccination, we are certainly not there yet.”

SETH BERKLEY
CEO, Gavi, the Vaccine Alliance

“Virology has become political but still is a research discipline. What we are addressing is the issue of prevention.”

CHRISTIAN DROSTEN
Director of the Institute of Virology, Charité – Universitätsmedizin Berlin, Germany

“Climate change affects poverty, affects hunger, certainly affects health.”

NATALIA KANEM
Executive Director, United Nations Population Fund (UNFPA)

“We need a global standard for health preparedness.”

URSULA VON DER LEYEN
President, European Commission

“Climate change affects poverty, affects hunger, certainly affects health.”

NATALIA KANEM
Executive Director, United Nations Population Fund (UNFPA)

“It is very critical in public health to count everyone and make everyone count.”

JOHN NKENGASONG
Director, Africa Centres for Disease Control and Prevention

“We need global responses to global challenges.”

AXEL R. PRIES
World Health Summit President

“Investment in health, and in vaccines in particular, should not be seen as a cost but as an investment.”

THOMAS TRIOMPHE
Executive Vice President, Sanofi Pasteur

“The future of medicine is data-driven, as we have seen in the corona crisis.”

HEYO K. KROEMER
CEO, Charité – Universitätsmedizin Berlin

“Virology has become political but still is a research discipline. What we are addressing is the issue of prevention.”

CHRISTIAN DROSTEN
Director of the Institute of Virology, Charité – Universitätsmedizin Berlin, Germany

“It is very critical in public health to count everyone and make everyone count.”

The World Health Summit is the unique international strategic forum for global health. Held annually in Berlin, it brings together stakeholders from politics, science, the private sector, and civil society from around the world to set the agenda for a healthier future. The World Health Summit was founded in 2009, on the occasion of the 300th anniversary of Charité.

**GOALS**
- Improve health worldwide
- Find answers to health challenges, guided by science
- Bring together stakeholders from all sectors and all regions of the world
- Facilitate open dialogue
- Strengthen international cooperations
- Set health agendas
- Foster the recognition of global health as a key political issues

**SPEAKERS AND PARTICIPANTS**
- Leading scientists and medical professionals
- Ministers and civil servants
- High-ranking officials at international organizations
- CEOs from industry and civil society
- Young professionals and students

**PRESIDENTS**
- World Health Summit President
  Axel R. Pries, Dean, Charité - Universitätsmedizin Berlin
- Annual International President
  Provided by the M8 Alliance, on a rotating basis

**PATRONS**
The World Health Summit is traditionally held under the patronage of:
- Chancellor of the Federal Republic of Germany
- President of the French Republic
- President of the European Commission
- Director-General of the World Health Organization (WHO)

**RESULTS**
- M8 Alliance Declaration
- Statements and recommendations for national academies, governments and international organizations
- Session reports

**INITIATIVES**
The World Health Summit supports young experts and innovative ideas:
- Entrepreneurs in Global Health
- New Voices in Global Health
- IAP Young Physician Leaders

**M8 ALLIANCE**
The M8 Alliance of Academic Health Centers, Universities and National Academies is the academic foundation of the World Health Summit. It is a growing network and currently consists of 30 members in 20 countries.

**GENERAL TOPICS**
- Basic Biological & Medical Research
- Clinical & Patient Research
- Pandemic Preparedness
- Diagnostics & Therapy
- Medical Technology & Engineering
- Health Policies & Systems
- Universal Health Coverage
- Translational Science & Medicine
- Public Health & Prevention
- Specific Diseases & Disorders
- Patient Safety
- Healthcare Facilities
- Drugs & Vaccines
- Regulatory Aspects
- Health Visions, Strategies & Ethics
- Evolutionary Medicine
- Demographic Change & Healthy Aging
- Global Health & Development

**SESSION FORMATS**

**Keynotes**
- 90 minutes
- Max. 5 speakers
- Up to 800 participants onsite

**Panel Discussions**
- 90 minutes
- Max. 6 speakers
- Up to 300 participants onsite

**Workshops**
- 90 minutes
- Max. 6 speakers
- Up to 150 participants onsite

WWW.WORLDHEALTHSUMMIT.ORG
At the World Health Summit 2021, global health experts from around the world gathered in Berlin and online and discussed the most pressing global health issues of our times. There have never before been so many speakers and sessions. The main theme was COVID-19, which was addressed from all possible perspectives. The mission and vision of the World Health Summit may never have been more relevant: To improve health worldwide via collaboration and open dialogue by bringing together stakeholders from science, politics, the private sector, and civil society from all regions of the world.

#WHS2021 IN NUMBERS

| 6,000 participants | 70 hours | 1,000 reports |
in Berlin and online | broadcasting time | in international media |

on-site | of all session recordings | of @WorldHealthSmt |
| 3,000 live participants | 220,000 views | 800 new followers |
at the opening session | additionally of sessions | on @WorldHealthSmt |
on October 24 | streamed by WHO | on Twitter in October 2021 |

| 377 speakers | 47% female speakers | 377 speakers |
| 120 countries | 47% female speakers | 120 countries |
| 67 sessions | 53% male speakers | 67 sessions |

CENTRAL TOPICS 2021

• Vaccine Equity: A Call to Action
• The Role of the European Union in Global Health
• WHO Council on the Economics of Health for All
• The Intersection of COVID-19 and Mental Health
• Unlocking Digital and AI Technologies for Health
• Pandemic Preparedness: Lessons from COVID-19
“The COVID-19 pandemic continues to throw up significant challenges, such as new variants of the virus or the syndrome known as long COVID, which we can only overcome together. I am therefore delighted that in 2021 the World Health Summit is once again bringing together experts working in science, politics, nongovernmental organizations and civil society around the world.”

ANGELA MERKEL
Chancellor of the Federal Republic of Germany (until 2021)

“In these two years, we have experimented a wealth of creative solutions for our public health: on vaccine sharing, on joint procurement of protective equipment and medicines, on ramping up the manufacturing of pharmaceutical products, on preparedness, let alone with the creation of the European Health Union. We are willing to share this experience with the world, and to learn from others who have also explored new solutions. The World Health Summit will be the perfect platform for this.”

URSULA VON DER LEYEN
President of the European Commission

“The central topics of this 13th annual World Health Summit highlight the complexities and challenges that we must collectively address to alleviate inequalities in access to health care and treatment, harness science and technology and ensure that we are adequately prepared to deal with any future health crisis. The European Union has a key role to play, and these issues will naturally be at the heart of the French Presidency of the Council of the European Union.”

EMMANUEL MACRON
President of the Republic of France

“In the coming months and years, other crises will demand our attention, and distract us from the urgency of taking action now. If the world continues down the same path, it will continue to get the same result, which is a world that is less healthy, less safe and less fair. Although the pandemic has robbed us of so much, it also gives us a unique opportunity to make real and lasting change for a healthier, safer and fairer future. The World Health Summit is an essential forum for the high-level discussions we need to move towards that future.”

TEDROS ADHANOM GHEBREYESUS
Director-General of the World Health Organization (WHO)

PATRONS 2021

PRESIDENTS

CHARLES IBINGIRA
International President 2021
Makerere University, Kampala, Uganda

AXEL R. PRIES
Charité – Universitätsmedizin Berlin, Germany

REGIONAL MEETINGS 2021–2022

2021, June 27–30
Kampala, Uganda & Digital

2022, June 15–17
Rome, Italy
At this year’s World Health Summit, let’s move from alarm to action. And let’s deliver the stronger health systems that every person deserves.”

ANTÓNIO GUTERRES
Secretary General, United Nations

“Let us join together at the World Health Summit to embark into a future in which we are all sufficiently prepared and coordinated in order to respond to outbreaks as a united global community.”

JENS SPAHN
Minister of Health, Germany (until 2021)

“Cross-border health threats need cross-border responses.”

URSULA VON DER LEYEN
President, European Commission

“The damage caused by COVID-19 has underscored the need for stronger global health architecture, and high-level political commitment, through a global compact or agreement to prevent and respond to pandemics.”

TEDROS ADHANOM GHEBREYESUS
Director-General, World Health Organization (WHO)
“Improving health for the global population requires strengthening supranational bodies.”
AXEL R. PRIES
World Health Summit President

“We need more innovation and we need to have it in a cost-effective way.”
BILL ANDERSON
CEO, Roche Pharmaceuticals

“No one is safe until we all are safe.”
SOAZIC ELISE WANG SONNE
Social Development Global Practice Young Professional, World Bank

“We have the choice: we can choose to act to reach more people with vaccines.”
HENRIETTA FORE
Executive Director, United Nations Children’s Fund (UNICEF)
“We need better attachment of decision-making structures to what comes out of science.”

CHRISTIAN DROSTEN
Director of the Institute of Virology, Charité – Universitätsmedizin Berlin

“We need to make sure all the vaccines we are receiving really go into peoples’ arms.”

LIA TADESSE GEBREMEDHIN
Federal Minister of Health, Ethiopia

“My call to action would be a better global governance—it is too fragmented.”

NGOZI OKONJO-IWEALA
Director-General, World Trade Organization (WTO)

“Solidarity is the gold standard in overcoming this pandemic.”

CHARLES MICHEL
President, European Council
“Health budgets are an investment that makes societies and economies stronger, more resilient and more equal. We need to rethink our policies, globally and locally. The question is how to make us collectively and as individual societies better prepared. How to become more resilient for future crises and threats.”

SANNA MARIN
Prime Minister, Finland

“We need to stop saying there’s no money. We need direct investments towards health for all, we need to reorient economic activities around health, we need to govern public and private finance for health for all.”

MARIANA MAZZUCATO
Professor, University College London

“Fact of the matter is, we all say: no one is safe until we are all safe. How does it really translate in concrete terms in policies and programs? This is the challenge we are facing.”

ELHADJ AS SY
Chair of the Board, Kofi Annan Foundation

“The political commitment to the WHO and the financing of the WHO needs to be ensured by its member states.”

ILONA KICKBUSCH
International Advisory Board Chair, Global Health Centre, Graduate Institute Geneva
The COVID-19 pandemic is far from over and we have to explore and implement innovative and effective measures to defeat this virus and to prepare for future threats.

The World Health Summit joins the voices that call for a new multilateralism and a new social contract.

Determination, cooperation and good leadership are required. Leaders need to act with determination to fight the pandemic nationally and globally. Societies and their representatives must also engage with foresight, in order to put into place a coherent ecosystem that will significantly improve pandemic preparedness and response. Jointly they must address flaws in the local and international governance mechanisms that proved to be inadequate during the crises.

There must be an end to the cycles of panic and neglect. A new approach is needed, not only for pandemic threats but also for other risks such as climate change, chronic diseases and food security—any preparedness and response strategies must move beyond silos and beyond a predominantly national focus. Risks are global and political priorities must reflect this. No one is safe until everyone is safe.

The World Health Summit and its partners together with the M8 Alliance call for determined action to:

• achieve vaccine equity by overcoming vaccine nationalism and vaccine hesitancy by sharing vaccines, increasing production in the global south, and supporting a TRIPS waiver;
• strengthening the efforts of partners from the Global South with the aim of developing more contextualized and effective approaches to global health challenges;
• strengthen global health architecture in the face of a fragmentation and decoupling of global health decision making; and
• support all countries to invest in Primary Health Care as the foundation of health systems and pandemic preparedness and end the underinvestment in public health, and recognize the contribution of women.

But that is not enough.

Political leaders must confront the underlying geopolitical tensions, social vulnerabilities and structural inequalities in their societies and between countries—it is the most vulnerable that are paying the price with their health and lives in this pandemic.

The World Health Summit stresses the fact that health is a human right and health security will only be achieved together with social and human security. Mechanisms driving and perpetuating inequity must be addressed.

The World Health Summit proposes 7 priority areas for action by political leaders to give global health structural and operational strength which corresponds to its impact on quality of life of people worldwide:
1. To ensure a global health governance approach that is backed and supported by all countries, and that values equity in health for all.

2. To move from an ad hoc, charity-based model of development assistance to a sustainable and predictable financing model that allows reliable pandemic preparedness and response mechanisms—the G20 proposals must lay the basis for such an approach in 2021 and beyond.

3. To strengthen the constitutional mandate of the World Health Organisation politically and financially, through a significant increase in the assessed contributions by member states.

4. To increase cooperation between health and other sectors, such as finance and education, to achieve a common understanding of the domestic and global investments required to achieve better health, and to build a new economics of health for all that supports Primary Health Care and invests in a stronger health workforce.

5. To establish a multilateral health architecture built on trust, mutual accountability, information sharing and transparency, including data solidarity.

6. To increase the support of integrated preparedness approaches such as ONEHEALTH, planetary health and integration of key global health issues like women’s health, mental health and NCDs in health systems.

7. To provide a strong binding political agreement and overarching umbrella on pandemic preparedness and response through negotiating a global Pandemic Treaty.

We call on the French and Czech Presidencies of the European Union to maintain strong support for multilateralism, and to lead the way for a new global social contract for pandemic preparedness. We call on the G7/G20 Presidencies 2022 of Germany and Indonesia to drive forward the vaccine equity agenda, and support the urgent governance and financing measures required to make it happen.
In-Depth Discussions in Critical Times

While ethical dilemmas and controversy have always existed in the Global Health field, the COVID-19 pandemic has brought a heightened awareness of the impact that health issues can have on different aspects such as international diplomacy and security, national economies, and the well-being of communities and individuals. This has brought up new questions that need to be addressed, with the potential to widen the dialogue to a broader range of stakeholders.

The topics encompass some of the priorities brought forward by the German Federal Government, as reflected in its Strategy on Global Health launched in October 2020. They also shaped the debates at the Policy Track by the Federal Ministry of Health.

Characterized by an absence of keynote speeches and individual presentations, the Policy Track sessions facilitated lively, open, controversial discussions among experts from academia, civil society, international organizations and policy makers. Further insights were provided by members of the audience by participating in polls through a digital tool. The responses provide an interesting overview of the audience’s opinions, which may be taken into account in further discussions on a national and international political level.

For instance, during the session named “A New Pandemic Treaty: The “Bretton Woods” Moment for Global Health?”, 85% of the audience participating in the online poll agreed that a pandemic treaty will bring added value to pandemic preparedness and response, albeit under certain conditions. Given the possibility to elaborate, participants provided statements including the following:

“It could ensure that countries report immediately and contribute to increased accountability. But to be successful all countries should get on board.”

“IHR centered on country level adherence. A Treaty focused on global & regional architecture could make space to fill gaps.”

“It would be a unique opportunity to devise rules [that] currently remain unregulated: how to frame solidarity between the Global North and the Global South.”

“It can address what the IHR cannot address and bring the right political attention.”

“A political solution is essential for true cooperation in ending pandemics.”

With this in mind, the German Federal Ministry of Health aimed to bring current international debates to Berlin and add a fresh perspective to big questions in the realm of Global Health through a new format at the World Health Summit 2021: the Policy Track.

The year 2021 did not lack important topics to dive into and bring forward. The pandemic exposed flaws in global pandemic preparedness and response, and initiated discussions on the need of a pandemic treaty to protect citizens from future health threats. Moreover, the interconnection between the environment, animal and human health has become even more apparent, with the One Health concept adopting an increasingly prominent role and fostering intersectoral collaboration. While prevention and treatment of diseases such as HIV/AIDS remain a key priority, mental health has received increased attention in 2021.
A further interesting question for the audience was asked during the session focusing on a suitable monitoring system: “Do you think that Universal Periodic Reviews are a suitable mechanism to monitor pandemic preparedness and response?” 52% of participants responded with “yes”, 17% with “no”, while 30% were undecided.

One session co-hosted by the Global Health Hub Germany (GHHG), focused on the highly relevant topic of mental health of youth, particularly as a consequence of the COVID-19 pandemic. The audience was asked what role digitalisation plays in mental health services for young people. The majority of 68% considered it to have a very central role, 32% defined it as “somewhat” important, while none of the participants saw it to play no role at all.

Finally, another session co-hosted by the GHHG peeked into Germany’s G7 presidency in 2022. When asked what makes an initiative launched by the “G formats” successful, the participants in the audience shared priorities such as “accountability”, “concreteness”, “inclusiveness”, “political will”, among other terms visualized through a word cloud.

Processes and discussions within Germany’s G7 Presidency will surely bring us closer to some agreement, while also bringing up new questions and discussions.

World Health Summit Regional Meeting – Uganda
June, 27–30, 2021
Kampala & Digital

HOST
Makerere University in partnership with the Government of Uganda

Makerere is Uganda’s largest and oldest institution (circa 1922) of higher learning and one of Africa’s best. Composed of nine colleges and one school, Makerere offers 284 programs to about 36,000 undergraduates and 4,000 postgraduates and has remained a center of academic excellence for the past 90 years.

Makerere University College of Health Sciences (MakCHS) is the leading medical research center in the region with four schools: Public Health, Bio-Medical Sciences, Medicine, and Health Sciences, offering 23 degree programs and graduating 600 health professionals annually. A key institution in both infectious and non-communicable diseases, MakCHS has made tremendous contribution to science globally over the years with key breakthroughs that have contributed to WHO treatment guidelines.

The Kampala Declaration on COVID-19 Vaccine Equity

The result of the World Health Summit Regional Meeting in Kampala, Uganda: clear demands and a powerful message of international collaboration. The Kampala Declaration on COVID-19 Vaccine Equity was signed by the Director-General of the World Health Organization (WHO), the President of Uganda, several ministers from Africa, M8 Alliance members, and the World Health Summit.

International President of the World Health Summit 2021

CHARLES IBINGIRA
Principal of the College of Health Sciences at Makerere University (until 2020)
The M8 Alliance is the academic foundation of the World Health Summit. A unique network of 30 leading international academic health centers, universities, and research institutions from 20 countries, it includes the InterAcademy partnership for Health (IAP), which represents all national academies of medicine and science.

All M8 Alliance members are committed to improving global health and working with political and economic decision-makers to develop science-based solutions to health challenges worldwide.

In addition to the annual World Health Summit in October in Berlin, the M8 Alliance organizes annual Regional Meetings, regular Expert Meetings, and Summer Schools in different parts of the world.

Monash University, Australia
As Australia’s largest university—with approximately 60,000 students from over 170 countries—Monash has seven campuses: five in Victoria, one in Malaysia and another in South Africa.

Montreal Clinical Research Institute, Canada
The IRCM was the first independent academic research center in Quebec to bring basic and clinical researchers together under a single roof.

National Taiwan University, Taiwan
Known for its diverse and international curriculum, National Taiwan University is made up of 11 colleges, 54 departments and 105 graduate institutes. It has a student body of around 30,000.

National University of Singapore
Founded in 1905, the National University of Singapore today consists of 16 different faculties and schools. Around 37,000 students can be found on its three campuses in Singapore and seven overseas locations.

Russian Academy of Medical Sciences, Russian Federation
Set up in 1944, the USSR Academy of Medical Sciences was considered the most prestigious scientific and medical organization in the Soviet Union. Its successor—the Russian Academy of Medical Sciences—was founded in 1992.

Sapienza University of Rome, Italy
Established in 1303 by Pope Boniface VIII, Sapienza is one of the oldest universities in the world. With about 115,000 students, it’s one of the largest in Europe as well.

Tehran University of Medical Sciences, Iran
The university is the oldest, largest, and most highly ranked comprehensive higher education institute in the field of medicine and public health in Iran, offering a wide range of courses and receiving applications from students from around the globe.

United Nations University International Institute for Global Health
UNU International Institute for Global Health is the designated UN think tank on global health and serves as a policy translation hub for UN member states, agencies and programmes. The Institute generates policy-relevant analysis by applying a gender lens to inform the development, implementation and evaluation of health programmes.

University of Montreal, Canada
A public research university that started with less than 100 students in 1878, the University of Montreal has more than 60,000 today. Comprised of 13 faculties and more than 60 departments, it has the highest sponsored research income in Quebec.

University of Geneva, Switzerland
Founded in 1559 as a theological and humanist seminary, the University of Geneva is renowned for emphasizing the unity of teaching and research. It’s the only tertiary-level educational institution of its kind in the region.

University of São Paulo, Brazil
Founded in 1934, the University of São Paulo arose from a combination of institutions, including a medical school. Today the largest university in Brazil is seen as the country’s most prestigious educational institution.

University of Paris, France
The University of Paris (UP) is one of the leading French research-intensive universities with over 60,000 students and covers a wide range of disciplines, with one of the most comprehensive and ambitious training offers. UP is a world-leading university in the fields of health sciences, physics, biology, earth and planetary sciences. UP is the result of the merger between Université Paris-Descartes, Université Paris-Diderot and the integration of the Institut de physique du globe de Paris, effective since January 2020.

World Federation of Academic Institutions for Global Health (WFAIGH)
A global network of academic health institutions, the WFAIGH was set up to help provide evidence to inform policies on global health issues.
Former World Health Summit speakers include:

ANGSAR TIETMEYER
Head of Public Affairs (until 2017) Deutsche Bank AG, Germany

CHARLES YANKAH
Chairman Afrika Kulturinstitut e.V., Germany
“If now we don’t make the changes that will be required in the short window of opportunity, we will never make them.”
JEREMY FARRAR
Director, Wellcome Trust

“Speeding up global vaccination is an absolute priority—and we are determined to continue to do our part.”
STELLA KYRIAKIDES
Commissioner for Health and Food Safety, European Commission

“We are at a moment of pandemic reckoning. Where we will be in 10 years will be dependent on how we tackle the inequalities.”
WINNIE BYIANYIMA
Executive Director, Joint United Nations Programme on HIV/AIDS (UNAIDS)

“Better data alone will not lead to better political decisions. But we have a responsibility to offer decision makers the best data we can.”
CHIKWE IHEKWEAZU
Assistant Director General, World Health Organization (WHO), WHO Hub for Pandemic and Epidemic Intelligence

“There currently is no comprehensive international guidance on the use of AI for healthcare in accordance with ethical norms and human rights standards.”
AGNÈS CALLAMARD
Secretary General, Amnesty International

“Women and girls need to be prioritized in any concept of global health security.”
INGER ASHING
CEO, Save the Children International

“In just two years we came pretty far but we also learned a lot about the health systems, about inequality.”
BERND MONTAG
President and CEO, Siemens Healthineers

“Women have been particularly exposed to this crisis.”
PETER SANDS
Executive Director, The Global Fund

“Women have been particularly exposed to this crisis.”
PETER SANDS
Executive Director, The Global Fund

“To better serve those living with rare diseases, it is crucial that we broaden our approach to generate data and deliver care. We also must continue to strengthen public-private partnerships grounded in improving patient health.”
BILL SIBOLD
Executive Vice President, Sanofi Genzyme

“Innovation is meaningless if it doesn’t reach the patient.”
THOMAS B. CUENI
Director-General, International Federation of Pharmaceutical Manufacturers & Associations (IFPMA)

“We need to improve the innovation, we need to make sure it comes through, we need to have stewardship.”
DAME SALLY DAVIES
Special Envoy on Antimicrobial Resistance, UK Government

“We are at a moment of pandemic reckoning. Where we will be in 10 years will be dependent on how we tackle the inequalities.”
WINNIE BYIANYIMA
Executive Director, Joint United Nations Programme on HIV/AIDS (UNAIDS)
“The world’s top health professionals come together (...)”

ARD TAGESSCHAU
(prime time edition)

“Now in Berlin many of the world’s top scientists, medics, and ministers are working through what they see as the next big challenges.”

AL JAZEERA

“This 2021 edition (...) will bring together the elite of the scientific, political, civil society and business world from 100 countries.”
