

# Collaborative partnerships in Global Health education: The Global Health Consortium and the INPACT collaboration in West Asia

*Dr. G. Klabbers*

*Vice-director MSc Global Health  
Maastricht University  
The Netherlands*

# The Maastricht MSc Global Health program

- Changing nature of globalization
- The local and the global: glocal
- Rethinking traditional dichotomies
- Interconnectivity
- Interdisciplinarity
- Governance

# Tackling Health across the globe requires

- International partnerships based on equality, replacing hierarchical, bilateral relationships
- New forms of governance to organise transparency, accountability, fair decision making
- Training of new types of experts, leaders and researchers with skills to effectively operate in this complex global arena
  - Able to think across disciplines
  - Able to operate effectively in international, intercultural settings

# The Global Health Consortium

# Collaborative partnerships in:

- Electives – 12 week track
- Manipal Learning Symposium – 2 weeks
- Foundations of Global Health

# Offering opportunities for

- Collaboration in transcontinental teams
- Self-management in a virtual work culture
- Development of cross-cultural intuition in diverse group settings
- Incisive decision-making in complex working environments
- Analysis and evaluation of global policies

# INPACT: international collaboration to advanced global health training in West Asia

- Establishment of an innovative, competence-based, multidisciplinary curriculum in Global Health in Iran
- Training center in Iran should serve as a regional 'hub' for knowledge dissemination
- Expertise in addressing regional GH challenges by means of effective and sustainable strategies
