Welcome

Congratulations on being selected to participate in the Young Physician Leaders programme in Coimbra on the occasion of the 2018 Regional World Health Summit. You will be joining 12 outstanding young physician leaders from Portuguese speaking countries in Africa, Europe and Latin America. The core days of the programme workshop on leadership development will be on 17 & 18 April 2018.

The goals of the workshop are:
1. to explore multiple models for effective leadership
2. to assess your perceived leadership strengths and identify areas for improvement
3. to explore the dynamics of working as part of a team
4. to develop mentorship and peer learning relationships to support your professional leadership development

Dr. Jo Ivey Boufford  
Dr. Teresa Oliveira  
Dr. Nuno Madeira

“Sponsorship and travel expenses to participants from low and middle income countries were granted by the WHO Regional Office for Africa.”
Pre-session preparation

A Please complete the attached questionnaire, which can also be found in the DROPBOX, keep a copy for yourself, and return the completed document by e-mail (jboufford@isuh.org, iap@twas.org) no later than 6 April 2018. The information you send will be kept confidential and not attributed to any individual; responses will be aggregated and the themes of the responses used for our discussions.

B Before the workshop please read the following articles which have been posted in the DROP BOX

If you have more time you may also wish to read the following articles also posted in the DROP BOX

- Heifetz, RA and Linsky, M., Ch. 2 “Get on the Balcony” in Leadership on the Line, Harvard Business School Press, Boston, 2002
- Fletcher, Joyce K. “The Paradox of Post-Heroic Leadership”

C Please review the World Health Summit Programme (https://www.worldhealthsummit.org/regional-meeting/program.html) and identify up to 5 topics that will be covered at the Summit that are of priority interest for you. Kindly provide this list to us by 6 April 2018 at tcarla@fe.uc.pt and jboufford@isuh.org

We look forward to meeting you all soon. If you have any questions, please feel free to contact us (iap@twas.org)

Dr. Jo Ivey Boufford  Dr. Teresa Oliveira  Dr. Nuno Madeira

YOUNG PHYSICIAN LEADERS 2018

PROFILES

1. Baptista Rui Miguel, Portugal
2. Castelo David, Liudmila, Sao Tome and Principe
3. Ferraz da Silva Luiz Fernando, Brazil
4. Laín, Inês, Portugal
5. Maculuve Braiton Zefanias Isac, Mozambique
6. Morais Ana Sofia Félix, Portugal
7. Rodrigues Helena, Portugal
8. Santos Azevedo Salvador Tiago, Portugal
9. Silva Claudia, Cape Verde
10. Silva Isaqueil Bartolomeu, Guinea-Bissau
11. Soares Miryan, São Tomé e Príncipe
12. Té Jerónimo, Guinea Bissau
1. **Baptista Rui Miguel, Portugal**

Rui Baptistas MD PhD is a curiosity-driven, Board-certified junior consultant in cardiology working in a large, university hospital in Coimbra, who graduated from University of Lisbon before heading to Coimbra in 2007 for his Cardiology residency. His clinical interests include the management of advanced heart failure and pulmonary arterial hypertension. His research is focused on understanding the molecular mechanisms behind pulmonary arterial hypertension and left ventricular dysfunction-associated pulmonary hypertension. He is also a teaching assistant of Cardiology of the Faculty of Medicine of the University of Coimbra and is pursuing a PhD on translational science. Due to my interest in heart failure, I have spent a 3-month period at the Pulmonary Hypertension Unit at Hopital Erasme, in Brussels, in 2012, under the supervision of Prof Jean-Luc Vachiery, and in 2014, thanks to a grant from the Harvard Medical School-Portugal Program, to visit for one month the Advanced Heart Disease Section of the Brigham and Women’s under the supervision of Prof Mandeep Mehra. He is also member of the 2017–2019 Directive Board of the Portuguese Society of Cardiology. One of his tasks among the Board is to improve acute heart failure care in Portugal through the dissemination of a hands-on full-day case-based course named “Acute Heart Failure Advanced Life Support - SAVIC”, developed in collaboration with the Brazilian Society of Cardiology and that has trained more than 500 Portuguese physicians. Additionally, he is also part of the Portuguese Congress of Cardiology Organizing Committee, being responsible for the organization of the Heart Failure and Pulmonary Hypertension-specific scientific program in the next two editions (2018-2019). The interaction with fundamental scientists was very enriching and the management of the animal models with right heart failure was very insightful into the mechanisms of disease progression and reversion. The PhD supported the development of a newer translational project, focused on the optical coherence tomography assessment of the pulmonary arteries of heart transplant candidates, with a view to identify virtual histology markers of pulmonary vascular disease, that has recently been founded under the European-funded Centro 2020 program.

2. **Castello David, Sao Tome and Principe**

Member and doctor in International federation of parenthood planning 2010 to 2016:President of medical committee in family planning association 2013 to 2015:Skills: Public health:- Health care management:- Gynecology and obstetrics::Experience: General medical doctor July 2008 – present data::Certifications::Diploma:FCMM- Havana_ Cuba::Professional:-- Health delegate (director) of district of Agua Grande:October 2015- September 2017 (primary health care):- Doctor at the maternity of cental hospital Dr. Ayres de Menezes 2010-2015::Courses::- Tuberculosis, Fiocruz-Rio Janeiro-Brazil 2012:- Women and children policy October 2013- November 2013:- Radiology November 2013- April 2014:- Reinforcement of Public Administration and Community Partnership for Reproductive Health“ May 2015-July 2915:- Participation on workshops:- Others courses national and international:::I am hard wording person who wants to pursue a career. I like to learning new skills. I have a kind and caring nature and i will do what i can to make a difference. I love to encouraging people or group. I have developed my commucation skills and feel able to communicate with other or diferent people::Currently i m working at hospital as general doctor in maternity, but i would like to be specialist.:
3. Ferraz da Silva Luiz Fernando, Brazil

Luiz holds a medical doctor degree, pathology residency and PhD in Pathology, all from University of Sao Paulo School of Medicine, Brazil and a Post-Doctoral / Research Fellowship from Massachusetts General Hospital, Boston, USA.

Luiz’s work includes research in autopsy pathology focusing pathological-radiological correlation and alternative strategies (such as minimally invasive autopsy) to investigate causes of death, using post-mortem angioCT, Sonography and 7 Tesla MRI.

Luiz teaches pathology for undergraduate and graduate students at University of Sao Paulo (USP) School of Medicine and is involved in the management of MD Curriculum in 2 USP MD programs (Sao Paulo and Bauru)

He is member of the Group for Research in Pathology Education (USA) and is the coordinator of the Bandeira Cientifica Project that provides interdisciplinary health care in vulnerable municipalities in Brazil

Luiz lives in Sao Paulo, Brazil, with his wife, his son and his two dogs. Luiz’s hobbies include classic music, reading and cycling.

4. LAINS Ines, Portugal

Dr. Ines Lains received her Doctor of Medicine degree from the Faculty of Medicine, University of Coimbra, Coimbra, Portugal, in June 2010. She was amongst the top three percent students of her university, and graduated as the second top student of her medical school class. She initiated her residency training in Portugal in 2011, and as an ophthalmology resident, she discovered that, in addition of patient care, she was also passionate for research. In light of this, she applied and was selected for the Harvard Portugal Program – a program developed by the Portuguese Government in collaboration with Harvard Medical School (HMS). While undertaking this two-year program, she also elected to enroll in a PhD program through a scholarship combining PhD training with residency. With this growing knowledge of the tools and skillsets needed to conduct clinical research, along with an increasing clinical understanding of ophthalmology, she applied and got awarded the Junior Grant and Career Development Award of the Portuguese Foundation for Science and Technology in collaboration with HMS. This prestigious grant gave her the opportunity to start a research fellowship at the Massachusetts Eye and Ear (MEE), HMS.

Since July 2014, Dr. Lains has been working at MEE. She is actively involved in the design and development of a multicenter, cross-sectional study with the aim of identifying novel biomarkers of age-related macular degeneration (AMD) and improving the knowledge on the pathogenesis of this blinding disease. To date, this study has successfully recruited over 500 patients and involves both Portuguese and American investigators and clinicians. Dr. Lains currently has 20 publications in peer-reviewed journals, 11 as first-author. Among other awards, last year she received the Evangelos Gragoudas Prize, which recognizes the best clinical paper in vitreoretinal diseases published by the HMS Department of Ophthalmology.

5. MACULUVE Braiton, Mozambique

Graduated in Medicine from Eduardo Mondlane University Medical School, Mozambique, in 2014;

Worked at the National Health Institute of the Ministry of Health of Mozambique as the clinical coordinator of the National Surveillance of Acute Diarrhea in 2014;

He worked as Director of the Marien Ngouaby Health Center in Xai-Xai City, Gaza Province;
Worked as Provincial Head of Noncommunicable Diseases in Gaza Province, Mozambique; Currently: The National Trainer for Neglected Tropical Diseases, Ministry of Health; The Provincial Head of Neglected Tropical Diseases, Gaza Province; The Coordinator of the Provincial Nucleus of Research of the Provincial Health Directorate, Gaza, Mozambique; The eventual Professor of the Chicumbane Health Training Center Braiton lives in Xai-Xai City with his fiancée.

6. **MORAES Ana Sofia Félix, Portugal**

I’m a Portuguese medical doctor working as consultant psychiatrist at the Coimbra Hospital and University Centre, namely in our Youth Mental Health Unit - in outpatient and inpatient settings - and at the Early Psychosis and Neurodevelopment Disorders outpatient units; these clinical areas are my main topics of research interest. I did clinical internships in 2016 at the Lambeth Early Onset Psychosis Unit (King’s College, London, UK) and at the Santa Maria Hospital’s Adolescent Unit (Lisboa Norte Hospital Centre, PT). My PhD thesis work’s title is “Neurofeedback at autism and schizophrenia: self-modulation of executive function with real-time fMRI”. I’ve contributed to several other research projects, such as “Emotional and behavioral dysregulation in a school population” – this looked on school violence screening and prevention in Coimbra. Our working group on school violence was composed of several civil society organizations: Coimbra City Council, police forces, the National Psychologists' Association, Portugal’s National Department of Education, the Portuguese Association for Victim Support and Amnesty International. I also had the chance to organize and kickstart a Liaison Psychiatry Unit for college students at Coimbra University in 2015, feeling how essential it is to bring youth mental health to the attention of decision-makers, in order to implement adequate policies of screening and mental health promotion in young adults and adolescents.

7. **HELENA RODRIGUES, Portugal**

I was born on June 27th 1978. I finished my Medical Degree in 2002. After that, I went on to do my General Residency in Hospital de S. José, in Lisbon. By then, It was clear to me that surgery was my passion, and I started my Maxillofacial Surgery Residency in 2005. After completing my residency, I became an Attending Maxillofacial Surgeon in the Maxillofacial Surgery Department in Centro Hospitalar Lisboa Central, a position that I maintain until this day. I embraced a new project and became a member of the first Pediatric Maxillofacial Surgery Unit in Hospital de Dona Estefânia, filling a gap that had been long present in our Institution, and my wish is that my colleagues and I will be able to contribute to the creation of a fully functional craniofacial unit, that can meet the standards of excellence. Keeping in mind the difficulties that made me struggle throughout my residency, I have been involved in orientation of Maxillofacial Surgery residents since the completion of my training and I am know the Coordinator of the Maxillofacial Surgery Residency Program and Pre-Graduate Teaching in my Department. I am also Assistant Professor of Oral and Maxillofacial Surgery and a member of the Directive Board of the College of Maxillofacial Surgery of the Portuguese Medical Association. I am married and have two children and my hobbies include hiking, mountaineering and martial arts.
7. **SANTOS** Azevedo Salvador Tiago, Portugal

Earned his MD at the University of Coimbra, in Portugal and completed his Residency at the Department of Psychiatry and Mental Health of Baixo Vouga Hospital Centre where he is currently a Psychiatry Consultant. Very much interested in psychotherapy - a certified family therapist and psychodramatist. Currently a Ph.D. student on Eating Disorders at the University of Aveiro. Amongst other activities, coordinates his Department’s Eating Disorders Outpatient Clinic and a Community Mental Health Team. He has been leading projects regarding community mental health in severe mental illness and prevention/intervention in violence against women, integrating health services with other state and non-state organizations. He is currently the elected head of the governing board of the Portuguese Society for the Study of Mental Health (SPESM), a scientific society which lobbies for a better integration of primary care and secondary mental health services and for the improvement of accessibility of patients to public mental health care. Full-time dad and husband; all the space between goes out for family & friends.

8. **SILVA** Claudia, Cape Verde

I have a degree of bachelor of medicine and bachelor of surgery, clinical medicine, by the Shanghai Jiao Tong University, Shanghai, China since 2013. Since October 2016 I am a member of the Cape-Verdean team for the Harvard Ministerial Leadership In Health Program (MLIHiH), working to improve Primary Health Care in Cape Verde. I am currently working as the Health Chief of Santa Cruz (a municipality of about twenty seven thousand people), responsible for a team of eighty one people in the Santa Cruz Health Center, Santiago Island, Cape Verde. Being the health authority in Santa Cruz, I am responsible for the programs of public health, health education and health inspection in representation of the Ministry of Health. Currently I am also the medical doctor responsible for the program of HIV in Santa Cruz, working with the Ministry of Health National Program for HIV/AIDS to achieve the 90 90 90 treatment target to help end the AIDS epidemic.

I am passionate about Public Health and I have been working hard since 2014 believing that it is extremely important to bet and believe in young physicians and help us improve our leadership skills so we can help our country and our Ministry of Health achieve a level of excellence in the provision of health care.

I started my career working in the Primary Health Care in March 2014 as the medical doctor responsible for the Health Center of "São Lourenço dos Órgãos", a peripheral municipality with little more than seven thousand people. I was responsible for a team of twenty one health professionals. From March 2014 to July 2016 I was responsible for the program of public health that included the programs of HIV, Mental Health, Tuberculosis, Health Inspection and Health Education in this small Municipality.

Since August 2016 I am the Health Chief of the Municipality of Santa Cruz, the fourth biggest Municipality of Cape Verde, and I am responsible for a team that has 81 professionals. Together we have been working, with important stakeholders, to help improve the health of the people of Santa Cruz and helping the Ministry of Health implement the National politics of health.
10. SILVA Isaquel Bartolomeu, **Guinea-Bissau**

I have worked at the Bandim Health Project in Guinea-Bissau (BHP, www.bandim.org) as a researcher since 2015, starting as a medical student. In 2016, I graduated with GOLD degree in General Medicine, Latin American Faculty of Medicine of Cuba and later did a course on field epidemiology by the Field Epidemiology Training Program (FETP). Since 2016, coordinator and supervisor of a randomized clinical trial conducted at the Bandim Health Project. In the trial we assess the effect of a second dose of measles vaccine in the second year of life. I am working with data from and closely monitoring an urban health and demographic surveillance system at Bandim Health Project. Since 2009, trainer of the National Youth Council of Guinea-Bissau (CNJ). In 2017 awarded a diploma of Best oral presentation and best original abstract at the first National Conference of Epidemiology of Guinea-Bissau. Currently, I am working with data from the national hospital Simão Mendes in Guinea Bissau assessing the different causes of hospital admissions on the pediatric ward.

---

11. SOARES Myriam, **São Tomé e Príncipe**

I am a cardiologist currently the head of the cardiology unit of the national referral hospital where I work and supervise the work of four other collaborators. I realized that in addition to patient care, I have a very important role in changing the behavior and lifestyle of the population. In this sense I have established as one of the major objectives to be achieved as the control of hypertension, and I aim to contribute to the eradication of rheumatic fever in Sao Tome and Principe for this I created a program wish I hope that could be implemented this year, making sure that the diagnose is maid but also the right follow up and medication is given. Another ambition I have is to implement prenatal diagnose of congenital heart disease, with that I am trying to reduce the number of children born with congenital heart disease and hopefully I can have the statistics to force the government to face the problem. Also I am interested in research in the cardiovascular area, having started the elaboration of data bases with the objective of documentation and later publications of scientific papers. Last but not least I believe in volunteering and being doing free medical treatment for people ho can’t afford to pay.

---

12. TE Jeronimo, **Guinea-Bissau**

Dr in medical sciences from the Latin American School of Medicine of the Republic of Cuba (ELAM) and postgraduate in Lisbon International learning program on mental health policy and services by new university of Lisbon (UNL). I am working now in research of drug users, I am focal point of West Africa Epidemiology Network on Drug use (WENDU) and African Union Commission for Drug Control and Crime. I am the director of the mental health referral center. I am a professor of mental health at Lusophone University in Guinea. I am living in Bissau, Guinea-Bissau with my wife and my two children.
Jo Ivey Boufford, MD, is immediate past President of The New York Academy of Medicine and is Professor of Public Service, Health Policy and Management at the Robert F. Wagner Graduate School of Public Service and Clinical Professor of Pediatrics at New York University School of Medicine. She served as Dean of the Robert F. Wagner Graduate School of Public Service at New York University from June 1997 to November 2002. Prior to that, she served as Principal Deputy Assistant Secretary for Health in the U.S. Department of Health and Human Services (HHS) from November 1993 to January 1997, and as Acting Assistant Secretary from January 1997 to May 1997. While at HHS, she served as the U.S. representative on the Executive Board of the World Health Organization (WHO) from 1994–1997. From May 1991 to September 1993, Dr. Boufford served as Director of the King’s Fund College, London England. She served as President of the New York City Health and Hospitals Corporation (HHC), the largest municipal system in the United States, from December 1985 until October 1989. Dr. Boufford was awarded a Robert Wood Johnson Health Policy Fellowship at the Institute of Medicine in Washington, DC for 1979–1980. She currently serves on the boards of the United Hospital Fund, the New York City Health and Hospitals Corporation (HHC), and Public Health Solutions formerly MHRA and the Health and Hospitals Corporation (HHC), and is a member of its Executive Council, Board on Global Health and Board on African Science Academy Development. She was elected to serve a second four year term as the Foreign Secretary of the IOM beginning July 1, 2010. She received an Honorary Doctorate of Science degree from the State University of New York, Brooklyn, in May 1992 and the New York Medical College in May 2007. She was elected a Fellow of the National Academy of Public Administration in 2005. She has been a Fellow of The New York Academy of Medicine since 1988 and a Trustee since 2004. Dr. Boufford attended Wellesley College for two years and received her BA (Psychology) magna cum laude from the University of Michigan, and her MD, with distinction, from the University of Michigan Medical School. She is Board Certified in pediatrics.

Teresa Carla Oliveira teaches and directs programmes in management and organisational behaviour in the Faculty of Economics of the University of Coimbra and is a member of the Centre for Business and Economics Research (CeBER), Centre for Health Studies and Research of the University (CECUS) and also of its Centre of Cooperative and Social Economy (CECES). She took her undergraduate degree in psychology and a master’s in educational psychology at Coimbra, before gaining a doctorate in organisational psychology at the University of London. Her research interests in people management address issues concerning enhancement of HRM in terms of both wellbeing and performance. She has undertaken a range of case studies in the private, public and social sectors, including financial, education, judiciary and health services. Her published articles have included: the role of intuition and power dynamics in personnel selection; tacit rules and implicit norms in managerial behaviour; performance indicators for purposeful engagement and employee wellbeing at work; careers, critical assessments of the concepts of human and intellectual capital, and critiques of New Public Management. She is an Associate Editor of the International Journal of Applied Management, Science and Engineering, an Associate of the Chartered psychology of the British Psychology Society and a reviewer for the Academy of Management. In 2015 her book Rethinking Interviewing and Personnel Selection was published by Palgrave.

Nuno Madeira is a Consultant Psychiatrist at the Coimbra Hospital and University Centre (CHUC), Centre (CHUC), where he works since 2005. A long-standing interest in the complexity of human behavior and brain functions was his main drive in becoming a psychiatrist. At the CHUC, amongst other clinical activities, NM coordinates the local Youth Mental Health Unit and had been developing several projects to improve patient care: he is the founder and head of the Early Psychosis Unit and started a Psychiatry Liaison Service with the local University’s Medical Department. His main clinical and research interests include schizophrenia and bipolar disorder, social and cognitive psychology, mental health care organization and medical education. NM earned his M.D. degree cum laude from the University of Coimbra in 2004, where he is currently a Ph. D. student, having excelled at all levels of pre-graduate and residency training, amassing several national scientific prizes and awards. He was at the governing board of the local students association, as a psychiatrist, he is the vice-president of the Portuguese Suicidology Society and member of the governing board of scientific societies such as the Portuguese Society for the Study of Mental Health and the Portuguese Society of Communication Skills in Health Care.

NM is an Invited Lecturer and Researcher at the Institute of Psychological Medicine (IPM) in the Faculty of Medicine – University of Coimbra. Besides lecturing both pre-graduate and post-graduate students and participating on numerous research projects at the IPM, he is a member of the Coimbra Institute for Biomedical Imaging and Translational Research, besides collaborating with other research units such as the Center for Neuroscience and Cell Biology, the Faculty of Psychology at the University of Coimbra and the University of Aveiro.

The InterAcademy Partnership (IAP) was formally launched in South Africa in March 2016, bringing together three established networks of academies of science, medicine and engineering. The three pillars of the InterAcademy Partnership include the three original academy networks, namely:

- IAP for Science (formerly IAP, the global network of science academies, founded in 1993);
- IAP for Health (formerly the InterAcademy Medical Panel, IAMP), founded in 2000; and
- IAP for Research (formerly the InterAcademy Council, IAC), founded in 2000

Under the new InterAcademy Partnership, more than 130 national and regional member academies work together to support the special role of science and its efforts to seek solutions to address the world’s most challenging problems. In particular, IAP harnesses the expertise of the world’s scientific, medical and engineering leaders to advance sound policies, improve public health, promote excellence in science education, and achieve other critical development goals.

IAP for Health is a network of the world’s medical academies and medical sections of academies of science and engineering. The organization is committed to improving health world-wide with the following goals:

- Strengthen the capacity of academies to provide evidence based advice to governments on health and science policy;
- Support the creation of new academies;
- Support the creation of projects by member academies to strengthen research and higher education in their countries; and
- Issue consensus statements on matters of importance to global health.

To contribute to building capacity around the issue of developing leadership qualities among health professionals, IAP for Health (formerly IAMP) launched its Young Physician Leaders (YPL) programme in 2011 in partnership with the World Health Summit (WHS) and the M8 Alliance of Academic Health Centres and Medical Universities.

To date, IAMP has trained 132 such YPL, all of whom are top young professionals, under the age of 40, who were nominated by their national academies. Their details can be found in the dedicated YPL Directory.

IAP projects are funded through donations from partner organizations such as IAP – the global network of science academies – along with generous in-kind support from member academies. Appreciation should be expressed to the Italian government which provides support to IAP host organization, The World Academy of Sciences (TWAS) in Trieste, Italy.

**Governance:**

**Executive Committee**

**Co-Chairs:**
- Prof. Detlev Ganten, Germany
- Prof. Liu Depei, China

**Members:**
- Academia Nacional de Medicina, Argentina
- Accademia Nazionale dei Lincei
- Academy of Sciences, Malaysia
- Hassan II Academy of Science and Technology, Morocco
- National Academy of Science and Technology, Philippines
- Academy of Science of S. Africa
- Swiss Academy of Medical Sciences
- The Academy of Medical Sciences, UK
- National Academy of Medicine, USA

**Ex-officio:**
- The World Academy of Sciences (TWAS)

**Secretariat**
- c/o TWAS, Strada Costiera 11, 34151 Trieste, Italy
- Dr. Peter McGrath, Coordinator
- Ms. Muthoni Kareithi, Project Assistant

HOST AND SPONSOR ORGANIZATIONS
The University of Coimbra is the oldest university in the country, and for centuries it was the only university in Portugal. The history of higher education in Portugal is bound closely to the history of this historic center of learning. Founded in 1290 by King Dinis in Lisbon, it was permanently settled in Coimbra in 1537, by order of King João III, after a period of migration between these two cities. Coimbra Hospital and University Centre (CHUC) mission is to deliver high-quality clinical care in a context of pre and postgraduate training with a strong focus on research, scientific knowledge and innovation. CHUC’s excellence centres ensure high standard healthcare services being the Portuguese hospital with the largest number of Centers of Reference and belonging to ten Europe Reference Networks.

Charité - Universitätsmedizin Berlin
The Charité - Universitätsmedizin Berlin is a joint institution of the Freie Universität Berlin and the Humboldt-Universität zu Berlin, and is one of the largest university hospitals in Europe. There, 3800 doctors and scientists heal, do research and teach at the top international level. More than half of the German Nobel Prize winners in medicine and physiology come from the Charité. It also has an international reputation for excellence in training.

M8 Alliance of Academic Health Centres, and Medical Universities
The M8 Alliance is a collaboration of academic institutions of educational and research excellence that recognizes responsibility to improve global health and works with political and economic decision makers and civil society to develop science-based solutions for health challenges worldwide. This international network gives the World Health Summit an outstanding academic background.

WHS - The World Health Summit
The World Health Summit is the annual conference of the M8 Alliance of Academic Health Centres and Medical Universities together with the National Academies. It is one of the world’s foremost gatherings of leaders from academia, politics, industry and civil society to develop joint strategies and take action to address key challenges in medical research, global health and health care delivery with the aim of shaping the political, academic and social agendas.

TWAS The World Academy of Sciences
TWAS is a global science academy located on the campus of the Abdus Salam International Centre for Theoretical Physics (ICTP) in Trieste, Italy. TWAS works to advance science and engineering for sustainable prosperity in the developing world by recognizing, supporting and promoting excellence in scientific research in the developing world; responding to the needs of young scientists in countries that are lagging in science and technology; encouraging scientific research and sharing of experiences in solving major problems facing developing countries.

“Sponsorship and travel expenses to participants from low and middle income countries were granted by the WHO Regional Office for Africa.”
